

AUSTRALIAN AND NEW ZEALAND INSTITUTIONS

The UQ Doctor of Medicine (MD) requires tertiary prerequisite subjects in cell biology and systems physiology, at second-year level, or equivalent, to be completed within 10 years of commencing the MD.

The following list is provided as a guide to applicants on programs and courses from UQ and other Australian and New Zealand Institutions which have been assessed and deemed to meet or not meet the subject prerequisite requirements. Please note programs and courses on this list which meet the prerequisite requirements need to be completed within 10 years of commencing the MD program to be valid to meet the subject prerequisite requirements. For example, if applying for the 2022 intake then prerequisite subjects must have been completed from 2012 onwards. This list will be updated as new assessments are completed, and reviewed annually, and is therefore subject to change. If your course or program does not appear on the list please contact us directly for an assessment using the contact details on our [prerequisite webpage](#).
